SUMMARY

Full Stack Developer with 1.5+ years of experience shipping production web applications end-to-end — Next.js, React, and Tailwind CSS on the frontend; Django REST Framework, FastAPI, and PostgreSQL on the backend. Skilled at translating Figma mockups into pixel-perfect, accessible UIs, designing REST APIs and database schemas, and integrating IoT/MQTT data pipelines for real-time dashboards. Delivered internal portals used daily by procurement, R&D, and operations teams. B.Tech CSE graduate, MDU Rohtak (2025).

KEY SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, TanStack Query, Axios, Responsive & Mobile-First Design

Backend: Python, Django, Django REST Framework, Django Channels (WebSockets), FastAPI, Node.js, REST API Design, JWT Auth / RBAC, Celery, MQTT (paho-mqtt), SQLAlchemy, Alembic

Database & Cloud: PostgreSQL, SQL, Database Modeling, AWS S3, AWS EC2

Tools & DevOps: Git, GitHub, Docker, Docker Compose, GitHub Actions (CI), npm, Postman, Vercel, Linux CLI, Figma → Code

PROFESSIONAL EXPERIENCE

Full Stack Developer

Ornate Solar — Okhla Phase-2, Delhi

Jan 2025 — Present

- Built and maintained internal portals end-to-end using Next.js, React, and Django REST Framework backed by PostgreSQL — owning work from data model to deployed UI.
- Designed and shipped 25+ REST API endpoints across inventory, production-process, and purchase-order domains, with multi-database routing on PostgreSQL to isolate domain data.
- Translated Figma mockups into pixel-perfect, accessible UIs with Tailwind CSS and reusable component patterns.
- Integrated TanStack Query for server-state management and optimistic updates across data-heavy dashboards.
- Implemented JWT auth with email-domain whitelisting, AWS S3 file storage, and Celery-based async background jobs for scheduled imports.
- Built a Django Channels + MQTT ingest pipeline (Mosquitto, paho-mqtt) for real-time solar inverter telemetry pushed live to a Next.js dashboard.
- Optimized API response times and frontend bundle size; resolved cross-browser compatibility issues for consistent rendering across devices.
- Collaborated with procurement, R&D, and design teams to align technical delivery with business workflows.

Frontend Developer

Blusys Infotech Pvt Ltd — Noida, Uttar Pradesh

Sept 2024 — Jan 2025

- Developed responsive web applications and internal dashboards from scratch using React.js, Next.js, Tailwind CSS, and Bootstrap.
- Built robust state management using Redux Toolkit and TanStack Query for high-performance, maintainable client portals.
- Implemented REST API integrations with Axios for real-time data fetching, processing, and display.
- Maintained clean, modular code structure focused on scalability, performance optimization, and cross-browser compatibility.

- Participated in code reviews and team debugging sessions to maintain high-quality deliverables.

KEY PROJECTS

Inventory & Production Management Portal

Django, DRF, PostgreSQL, Celery, AWS S3, JWT, Next.js, TanStack Query, Tailwind

- Full-stack manufacturing operations platform owning the entire production lifecycle — raw material check-ins, multi-step process sequences, scrap tracking, purchase orders, and per-product cost rollups.
- 25+ REST endpoints; multi-database routing on PostgreSQL; configurable process-step engine with signal-driven inventory updates.

Solar Inverter Power Analytics

Django, DRF, Django Channels, MQTT, PostgreSQL, JWT, Next.js, Tailwind

- IoT-driven analytics platform; ingests live telemetry from a Mosquitto MQTT broker, persists 15-minute interval time-series in PostgreSQL, and pushes updates to a Next.js dashboard over WebSockets.
- Cost-optimized — no TimescaleDB or Redis required; chatbot module for plain-language data queries; Dockerized with AWS deployment.

Inverter Shipment Tracking & Installation Portal

FastAPI, SQLAlchemy, Alembic, PostgreSQL, Docker, Next.js, Tailwind

- Full-stack portal tracking inverter shipments and installation jobs end-to-end — from dispatch to on-site commissioning checklists.
- FastAPI backend with RBAC, configurable installation-checklist templates, Alembic migrations, pytest suite, and background workers; Next.js frontend with a dedicated PDF generator; Dockerized dev/prod stacks with GitHub Actions CI.

Purchase Order Management System

Django, PostgreSQL, Next.js, Redux Toolkit, TanStack Query, Tailwind

- End-to-end PO lifecycle tool — vendor management, line-item PO creation, approval flow, and delivery tracking.
- Server-state caching with TanStack Query for fast list/detail views; Axios with centralized error handling.

Daily Report Portal

Django, FastAPI, PostgreSQL, Docker, Next.js, React, Tailwind

- Internal reporting platform with a dual-framework Python backend — Django for migrations and admin, FastAPI for typed JSON APIs.
- Shared PostgreSQL with pgAdmin, fully containerized with Docker Compose; auto-applied migrations and superuser bootstrap on container startup.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

2021 – 2025

Maharshi Dayanand University, Rohtak, Haryana
